# Performance Analysis

## **Print Quality**

The HP Envy 5055 offers impressive print quality for both documents and photos. Text is crisp, and colors are well-saturated, making it suitable for personal and professional use. However, photo enthusiasts may notice slight limitations in color depth compared to higher-end photo printers.

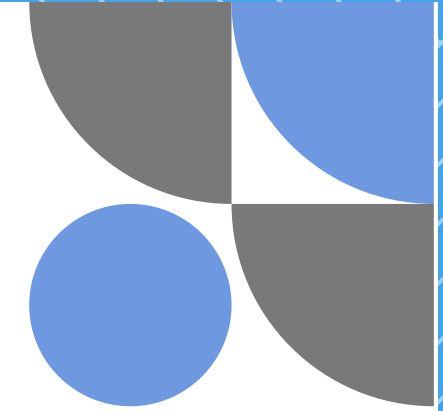

## **Ease of Use**

## **Speed and Efficiency**

With a print speed of around 10 pages per minute for black-and-white and 7 pages per minute for color, it's adequate for casual use. However, it's not the fastest in its category, so high-volume users may need a different option.
