Understanding Diabetes: Types & Causes

Diabetes occurs when blood sugar levels become too high due to issues with insulin production or function. The major types of diabetes include:

1. Type 1 Diabetes

- Autoimmune condition where the body attacks insulin-producing cells.
- Requires **lifelong insulin therapy**.

2. Type 2 Diabetes

- The most common form, caused by **insulin resistance**.
- Managed with **medications, diet, and lifestyle modifications**.

3. Gestational Diabetes

- Develops during pregnancy and can affect both mother and baby.
- Requires **careful monitoring** to prevent complications.

Why Ahmedabad Residents Trust Dr. Hinesh Acharya for Diabetes Care?

- ♥ **10+ Years of Experience** – Proven expertise in diabetes management.
